```javascript
const person = {
    name: "",
    age: "",
    country: "",
    id: "",
    description: function() {
        return `This is ${this.name}, ${this.age} years old from ${this.country}
with ID ${this.id}.`;
    }
};

function insert() {
    person.name = document.getElementById("name").value;
    person.age = document.getElementById("age").value;
    person.country = document.getElementById("country").value;
    person.id = document.getElementById("id").value;

    document.getElementById("info").innerText = person.description();
}
```
